Anna Demeshko

annademeshko.com

Product designer with **4+ years of experience** in B2B, B2C and SaaS. I make complex, data-heavy products easier to use, from cybersecurity and AI workflows to web and mobile apps. I work across research, prototyping, design systems and delivery, using AI tools to test ideas and build working prototypes.

Experience

Swordfish Security / AppSec Solutions · Product Designer
September 2024 - August 2026

- Designed an AI-assisted vulnerability triage flow that reduced analysis time by approximately **60%**, from 6-8 to 2-3 hours per large scan.
- Built a configurable security dashboard for DevOps, AppSec analysts and managers, adapting information to their roles and tasks.
- Designed data-heavy interfaces: tables, filters, statuses and workflows for analysing and managing scan results.
- Developed components, states and handoff specifications for the design system, reducing clarification requests by approximately **40%**.
- Worked with product managers, security analysts, ML engineers and developers from discovery and research through delivery.

Freelance · Product / UX/UI Designer
January 2022 - August 2026

- Owned end-to-end design for web and mobile products, SaaS services, dashboards and MVPs, from problem framing to release and iteration.
- Created information architecture, user flows, wireframes and interactive prototypes; ran UX audits, competitor analysis and usability tests.
- Built component libraries and UI patterns, prepared developer handoff and reviewed implementation quality.
- Mobile work includes **REMATE**, a padel and tennis app covering onboarding, finding a court and booking.

Positron / Grokhotov Studio · UX/UI Designer
January 2023 - December 2024

- Designed commercial digital products and responsive web interfaces, including redesigns informed by business goals and user feedback.
- Created wireframes, high-fidelity UI and interactive prototypes; maintained UI kits and reusable components.
- Conducted usability tests and presented solutions to clients, stakeholders and engineering teams.
- Managed several design streams while meeting delivery timelines and quality requirements.

Selected projects

REMATE · Padel and tennis mobile app.
CoPilot · AI-assisted vulnerability triage.
NOVA · iGaming onboarding and first deposit.
Track · Configurable security dashboard.
