About

Product designer with 4+ years of experience in B2B, B2C, and SaaS products. Specialize in complex, data-heavy interfaces, AI functionality, and products for professional users. Turn technically complex processes into clear, scalable user flows—from research and hypothesis testing to product launch.

At a cybersecurity product, designed an AI workflow that reduced the time needed to analyze results by approximately 60%, and contributed to the design system, which reduced design-development clarification requests by approximately 40%.

Especially interested in products in cybersecurity, developer tools, AI, and enterprise software.

Swordfish Security

Product Designer · Saint Petersburg · Middle

Designed an AI workflow for vulnerability analysis that reduced the time to analyze a large scan by approximately 60%—from 6–8 hours to 2–3 hours;

- Developed a configurable security dashboard for DevOps, AppSec analysts, and managers, tailored to different roles, tasks, and levels of data detail;
- Designed complex, data-heavy interfaces: tables, filters, statuses, and workflows for analyzing and managing scan results;
- Contributed to the design system by defining component states and variants, usage guidelines, and development specifications. This helped reduce clarification requests during design handoff by approximately 40%;
- Worked closely with product managers, information security analysts, ML engineers, and developers—from task definition and research through to launching features in the product.

Positron - Grokhotov Studio

UX/UI designer · Saint Petersburg · Middle

Designed interfaces for commercial digital products, web services, and client solutions;

- Created wireframes, mockups, interactive prototypes, and high-fidelity designs;
- Developed responsive interfaces for web products;
- Led redesigns and improved user flows based on business needs and feedback;
- Maintained and developed design systems, UI kits, and reusable components;
- Conducted usability testing and gathered user feedback to optimize interfaces;
- Presented design solutions to clients, stakeholders, product teams, and development teams;
- Managed multiple projects simultaneously while meeting deadlines, requirements, and quality standards.

Education

date not specified —
Jan 2022

Saint Petersburg National Research University of Information Technologies, Mechanics and Optics

Bachelor's Degree · Information Security Analytics

date not specified —
Jan 2018

Saint Petersburg State University of Aerospace Instrumentation

Bachelor's Degree · Theoretical and Applied Linguistics
